

CLEAN WATER PARTNERSHIP GLEN ESTATES COMMUNITY

Prince George's County in alliance with the Clean Water Partnership (CWP) has been working on the planning and design of water quality improvement projects across Prince George's County.

CONSTRUCTION INFORMATION

Contractor: Kirila Earthworks

CONSTRUCTION START: October 2019

CONSTRUCTION COMPLETION: June 2020

CONSTRUCTION HOURS (TYPICAL):

7:00 AM - 4:00 PM Monday - Friday

Weekend work as needed.

TYPE OF DEVICE:

Pond Retrofit

ACTIVITY:

Our contractors will be constructing a pond retrofit at 5707 Forbes Blvd. Lanham, MD. This project is being completed to meet regulatory requirements for treating stormwater within the county. The construction team will make improvements to the existing retention pond. The

device works by collecting stormwater from the surrounding impervious areas, allowing it to pond and be released at a controlled rate over an extended period of time. Sediment and other pollutants that drop will be trapped within the forebay areas. Construction activities will include pond excavation and haul off, gabion forebay installation, inflow/outfall rip rap protection, and potential fence installation and/or tree removal. Please refer to the image above to identify key locations during the construction process. In addition, a safety fence will be maintained around the site for the duration of the project.
