within the construction area during the day and exit
via Edmonston Road to Greenbelt Road.

PROJECT DETAILS:

This project is being constructed to create more green
space for the collection and filtration of stormwater by
adding a sand filter on the school grounds. This device
collects and filters polluted stormwater from the impervious
spaces in the neighborhood, producing cleaner water
that will eventually flows into our larger bodies of water.
Construction activities will include land excavation and haul
off, device installation, pipe installation and landscaping.
