

CLEAN WATER PARTNERSHIP - FOREST HEIGHTS ELEMENTARY CONSTRUCTION INFORMATION

THE PROJECT ADDRESS IS:
200 TALBERT DRIVE
OXON HILL, MD 20745

CONTRACTOR: SMC

CONSTRUCTION START: Late July 2019

CONSTRUCTION FINISH: Late August 2019

CONSTRUCTION HOURS (TYPICAL):

7:00AM - 4:00PM Monday - Friday; weekend work as needed to compensate for weather related delays.

SITE ACCESS: Construction vehicles will use Talbert Drive to access the school parking lot. The vehicles and equipment will remain in the southwest end of the parking lot during the day and exit via Talbert Drive.

PROJECT DETAILS: This project is being completed to create more green space for the collection and filtration of stormwater by adding a micro-bioretenion pond at the southwest end of the parking lot. This device filters polluted stormwater from the impervious spaces on the school's campus, eventually producing a cleaner product, into our larger bodies of water. Construction activities will include land excavation and haul off, device installation, pipe installation and landscaping.
