

CLEAN WATER PARTNERSHIP - WALDEN WOODS ELEMENTARY CONSTRUCTION INFORMATION

LEGEND

- Limit of Disturbance
- Proposed Micro-Bioretenion
- Trucks Entering Site
- Trucks Exiting Site

THE PROJECT ADDRESS IS:
10301 THRIFT ROAD CLINTON, MD 20735

CONTRACTOR: SMC

CONSTRUCTION START: Mid July 2019

CONSTRUCTION FINISH: Late August 2019

CONSTRUCTION HOURS (TYPICAL):
7:00AM - 4:00PM Monday - Friday; weekend work as needed to compensate for weather related delays.

SITE ACCESS:
Construction vehicles will use Thrift Road to access the school parking lot. The vehicles and equipment will remain in the southwest end of the parking lot during the day and exit via Thrift Road.

PROJECT DETAILS: This project is being completed to create more green space for the collection and filtration of stormwater by adding a micro-bioretenion pond at the southwest end of the parking lot. This device filters polluted stormwater from the impervious spaces on the school's campus, eventually producing a cleaner product, into our larger bodies of water. Construction activities will include land excavation and haul off, device installation, pipe installation and landscaping.
