

Angela D. Alsobrooks
County Executive

PRINCE GEORGE'S COUNTY COUNCIL SESSION CLEAN WATER PARTNERSHIP FY19 OVERVIEW

The Clean Water Partnership

- A 30-year partnership between Prince George's County, Maryland and Corvias to identify, design, build, finance, operate and maintain stormwater assets.

- Based on the Community-Based Public Private Partnership (CBP3) model as developed by the USEPA Region III.
- Intentionally developed to provide multiple, overlaying benefits (socioeconomic, environmental, implementation efficiency, local uplift, compliance surety).

Stormwater can be an impactful infrastructure program that achieves broader County policy goals and objectives:

- Achievement of greater cost savings, innovation, efficiencies and economic development output are possible across County infrastructure programs
- More effective utilization of a partnership – treating it less like an environmental contractor and more like a partner in its overall infrastructure strategy
- Can increase efficiencies and job creation opportunities by **NOT** duplicating efforts across CIP, DPWT & CWP, leveraging the established subcontractor capacity & workforce development programs across all of them
- Improvements to the funding strategy that reduces pricing and allows for flexibility in procurement that creates opportunities for SMWBE firms to grow

Performance Based Results:

- **131** projects completed across nine County Council districts in 54 months to date
- **2,236** acres retrofitted for MS4/TMDL permit compliance
- Local Economic Impact
 - 85% (\$111M) Total Expenditures to Target Class Businesses
 - 57% County Resident Work Hours
- Community Impact
 - 22 Faith-based retrofits through the alternative compliance program (ACP), 54 school projects through the partnership with Prince George's County Public Schools, and 28 retrofits on municipal property throughout the County
 - Over \$500,000 invested in community partnerships i.e. youth and environmental literacy programs, 25 Mentor Protégé Program participants and paid internships for over 50 Prince George's County students
 - Greening and beautifying our landscape planting 417 trees and 12,294 shrubs and improving our local rivers and streams removing over 27 million pounds of sediment and 8 tons of tons of trash

A group of approximately 12 students from Woodmore Elementary School are posing for a photo in front of their school's brick entrance sign. The sign reads "Woodmore ELEMENTARY SCHOOL". The students are holding four large, colorful signs that promote the BPOCCWP program. The signs read: "CLIMBY WITH A CHANGE OF PANTS GARDENING" (purple), "WORKING TOGETHER IN OUR ENLARGED PUBLIC GARDENS!" (green), "BE THE BOSS, DON'T BE A BULLY" (yellow), and "BPOCCWP" (purple). The students are dressed in casual school attire, and the background shows a grassy area and some trees under a cloudy sky.
